At the end of 2011, 1046 employees worked at SJSC Riga International Airport.

Distribution of Riga Airport staff by sphere of work:
- Passenger services: 62%
- Infrastructure services: 29%
- Administration: 9%

Distribution of Riga Airport staff by age group:
- 18–30: 35%
- 31–40: 22%
- 41–50: 20%
- 51+: 22%
Greater Choice in Destinations

In 2011 seven new destinations were offered from Riga International Airport. The Latvian national carrier airBaltic opened new routes to Budapest (Hungary), Gdansk (Poland) and Bari (Italy). The Irish budget airline Ryanair expanded its route network in the direction of Rome (Italy) and Leeds (UK) whereas Wizz Air – the Central and East European low-cost carrier launched flights to Eindhoven (the Netherlands). Turkish Airlines in 2011 opened regular traffic to the holiday destination Antalya (Turkey).

The passengers of the first flights were traditionally treated to cakes specially designed to symbolise the new destination. For opening of routes SIC Riga International Airport on three occasions won the recognition of the popular aviation industry portal www.anna.aero - the title Cake of the Week for the most attractive pastry. The title was awarded for the cake created for the route Riga – Budapest in the form of a Rubik’s cube in honour of the Hungarian sculptor and professor of architecture Ernő Rubik. The next winner was the cake baked for the flight to Rome representing its historical landmark – the Colosseum. The title was given also to the cake for Riga – Eindhoven route that was shaped as an electric bulb reminding that in Eindhoven a factory of electric bulbs was founded that grew into the world-famous electronic company Philips.

The year 2011 saw new flights from Riga International Airport to the Sweden’s second largest city Gothenburg being launched by the airline Skyways, whereas Ryanair resumed flights to Bristol in the UK and Tampere in Finland. In total, by the end of 2011 from Riga International Airport travellers could reach 82 destinations.
Punctuality Ratio

The Ground Handling Department of Riga International Airport attained the historically highest quality ratio in passenger and aircraft handling. By providing high-quality professional services to the airlines the Ground Handling Department reached a 99.76 percent punctuality enabling the passengers to arrive at their destinations on time and successfully accomplish their plans. In the aviation industry this result is considered excellent. From the international viewpoint and compared with other European airports, Riga Airport in terms of punctuality is among the leaders.

Statistics of Passenger Traffic, Aircraft and Cargo

In 2011 Riga International Airport welcomed 5.1 million passengers (9.5 up year on year), and for the first time in its history exceeded the significant figure of five million by breaking the record of annual passenger traffic. On 21 December the airport celebrated the arrival of its five millionth passenger Ms Dace Dūbitė-Ose who came on the airBaltic flight from Oslo. By serving five million passengers per year, according to the ranking of Airports Council International, Riga International Airport has officially joined the ranks of medium-sized airports and internationally will not be treated as a small airport any more.

Transfer and transit passengers last year accounted for 37 percent of the total number of passengers handled at the airport, and the most popular transfer/transit destinations were Vilnius, Tallinn, Helsinki, Moscow and Berlin.

In 2011 2 563 970 travellers departed from Riga and 2 542 956 travellers arrived in the capital of Latvia.

In the total passenger traffic in 2011 66 percent were carried by the national carrier airBaltic and 20 percent by the airline Ryanair. In comparison with the year 2010 the number of passengers was boosted by the airlines Wizz Air (+62%), Finnair (+40 %) and Aeroflot (+34%). The number of handled aircraft last year rose by 7 percent (72 855 aircraft) and cargo was three percent up (12 665 t).

The number of handled aircraft last year rose by 7 percent (72 855 aircraft) and cargo was three percent up (12 665 t).

Most Popular Destinations

In 2011 the travellers gave preference to the following destinations: London chosen by 408 922 passengers or 8 percent of the total passenger traffic, Moscow - 279 914 passengers (5.5%), Helsinki - 265 321 passengers (5.2%), Oslo - 262 387 passengers (5.1 percent) and Stockholm - 216 199 passengers (4.2 percent).

The top three destinations have changed over the last years: Oslo has been replaced by Moscow as the second most popular destination that has climbed up from the fifth place and pushed Oslo down to the fourth place. Compared with the year 2010, Dublin has left the top ten destinations while Milan has entered the list.
Baltic Statistics

By handling more than half of the air traffic in the Baltic states Riga International Airport is the leader in the region. In 2011, thanks to 5.1 million passengers welcomed, the market share of Riga International Airport was 53 percent.

The second biggest airport in the Baltic is Tallinn with 1.9 million passengers and a market share of 20 percent. The third and fourth places belong to the Lithuanian airports: Vilnius with 1.7 million passengers and a market share of 18 percent, and Kaunas Airport with 0.8 million passengers and a 9 percent market share.
Renovation of Commercial Areas
AV LATVIA and ATU Duty Free in 2011
TAV Airports Holding was awarded the tender of management of the commercial areas at Riga International Airport for 10 years and the agreement was signed on 30 September 2010. Commercial planning and renovation activities were initiated immediately in order to provide the highest service quality and best industry standards to the passengers, staff and other stakeholders of Riga International Airport. Hence, TAV LATVIA was founded to act on behalf of TAV Group in Latvia and is proud to quickly increase the commercial standards and become the best partner of Riga International Airport through its net contribution of more than ten (10) million Euros in 2011.

Brand New Duty Free Experience
TAV Airport Holding’s subsidiary ATU Duty Free started its operation in Latvia on 01.01.2011. The multi-million Euro worth renovation project lasted until the end of December 2011. Riga is unique as it is the first step of ATU Duty Free to the European Union grounds and added a new dimension to its travel retail services: travel value shopping concept where ATU aims to entice all passengers regardless of their final destination.

When ATU Duty Free took over the operation of travel retail areas at RIX, all 20 stores were operated by 9 different companies, which became subcontractors. Gradually this number decreased and several stores were merged to create more spacious ones. By the end of 2011, ATU Duty Free has 8 stores of its own and 7 subcontractors in 1307 square meters.

One of the first changes ATU Duty Free brought to travel retail in Riga is the fashion and accessories store, which is also the first store renovated. Passengers have been given the exclusivity to find international brands such as Hugo Boss, Prada, Gucci, Emporio Armani, Maurice Lacroix Svarovsky, Ray – Ban in this store.

The classic assortment of travel retail products: perfumes, cosmetics, liquor, tobacco, chocolates and sweets can be found in strategically placed stores where passenger traffic flows between the gates. Specialized and mixed category stores offer worldwide brands such as Bulgari, Chanel, Clarins, Clinique, Estee Lauder, Guerlain, La Prairie, Lancome, Yves Saint Laurent, Absolut, Anthoney Berg, Camel, Caruso, Chivas, Courvoisier, Davidoff, Glenfiddich, Jaegermeister, Lindt, Lucky Strike, Marlboro, Nestle, Niederegger and more. Moreover, local products form another major product line at ATU Duty Free stores. Riga Black Balsam and Laima chocolates are the most preferred local brands which present tasty last minute opportunities to passengers who would prefer to take home a unique memory from Latvia.

Serving and caring for all - Travel Value & Staff Shop
Until 1999 passengers travelling within the European Union could benefit from duty free shopping however after changes in legislation, this was no longer possible. Duty free operators introduced a new concept called travel value so that passengers can still enjoy better prices than high street but not as good as duty free prices due to introduction of duties on the products sold to passengers who are travelling within the EU.

In 2012, ATU Duty Free is planning to open its new Staff & Crew Store, exclusive to Riga International Airport employees, where they are going to be able to find a selection of travel retail products with significant discounts compared to its duty free prices.

About TAV Group and ATU Duty Free
TAV Group is one of the global leading airport construction and operation companies. TAV is organized in a unique structure to take advantage of a specific gap in the aviation sector by providing integrated airport services including construction, operation and financing of all kinds of airport projects. 15 companies including 9 airport operation companies; TAV Istanbul, TAV Ankara, TAV Ege, TAV Alanya, TAV Georgia (Tbilisi and Batumi Airports), TAV Macedonia (Skopje and Ohrid Airports), TAV Tunisie (Monastir and Enfidha Airports), TAV/ Madinah, TAV Latvia, while 6 service companies, ATU (duty-free), BTA (F&B), HAVAS (ground handling), TAV IT (IT Services), TAV Security and TAV O&M (specialized operations services), are all bundled under the roof of TAV Ports Holding. TAV Construction, construction arm of TAV Group, is the 4th largest airport construction company in the World according to ENR Ranking with a total project value of over USD 10 billion. Its first project in Gulf Region was Emirates New Engineering Centre Hangar Roof Structural Steel Work in Dubai International Airport, UAE. Subsequently, TAV Construction has participated or been participating in the following projects: the construction of the new terminal 3 in Cairo International Airport in Egypt, the construction of New Doha International Airport Passenger Terminal Complex Project in Qatar, the construction of the Enfidha Airport in Tunisia, BCT (Build-Operate-Transfer) projects of Tbilisi and Batumi International Airports in Georgia, Infrastructure Works Package (MCT) of Muscat International Airport in Oman, construction projects: Sabha and Tripoli Airports and BCT (Build-Operate-Transfer) projects of Istanbul Atatürk International Airport, Ankara Esenboğa International Airport and Izmir Adnan Menderes International Airport in Turkey.

ATU DUTY FREE is an international duty free operator chain established in 2000 as a strategic partnership between TAV Airports Holding, Unifree Duty Free A.S. and Gebr. Heinemann. It is the sole duty free operator of Istanbul, Izmir, Ankara airports in Turkey, Tbilisi and Batumi airports in Georgia, Enfidha-Hammamet International Airport in Tunisia, Skopje and Ohrid airports in Macedonia and Riga International Airport in Latvia.
New Boarding Gates

In the terminal of Riga International Airport three new boarding gates were constructed to increase the capacity for handling the departures to the countries of the Schengen area. The gates were built in less than four months by reconstructing the locker rooms of the airport’s ground handling staff on the ground floor and decreasing the passenger flow to the Departures Sector A.

The construction works were performed by the companies Arčens and Moduls-Rīga and the total costs of the project were 430 thousand lats.

The Most Modern Bird Control Radar in Europe

Sadly, every year 40,000 aviation accidents in the world are caused by birds. Therefore it is the airport’s duty to ensure safe take-off and landing of aircraft. Since February 2011 a bird control radar MERLIN™ has been operating in the territory of Riga International Airport.

It indicates the locations of bird activity and the directions of bird migration, determines the risk level in a specific sector or altitude (depending on the birds’ weight, location and flight direction), produces visual and sound warning signals; automatically sends daily reports to specified e-mail addresses. The data are processed and stored on a server.

The minimum range of operation of the horizontal radar is 11km, of the vertical radar – 5.5km.

Riga International Airport is the first airport in Europe where the bird control is implemented by the radar system MERLIN™.

Oversize Baggage Belts and Improved Work Conditions

In 2011 several improvements were made in the passenger service and the staff work conditions. In both arrival halls of Riga International Airport the oversize baggage reclaim points are available for the passengers’ convenience. At non-standard baggage reclaim points the passengers can pick up their bikes, skis and other tourist and sports equipment exceeding the regular size without disturbing their fellow-travelers.

In the terminal, in order to improve the work conditions of the staff, a lighting system at the length of 66 metres was installed considerably improving the lighting of the workstations.

The information on arrivals/departures, checking-in, and claiming of baggage was greatly improved by installing ninety new LCD monitors in the airport territory. They are of better quality than the previous ones and, apart from the flight information, they can transmit announcements of other news important for passengers and the airport.
European Regional Development Fund Project „Introduction of New Services at SJSC Riga International Airport“

The Investment and Development Agency of Latvia approved the project of Riga International Airport on introduction of new services and on 19 August 2011 the agreement with the agency was signed on implementation of the project. Within the project framework electronic security control gates (e-gates) will be installed, a new baggage reconciliation system introduced as well as the wireless data transmission network established at the airport.

E-gates will be installed for automated checking of boarding passes and will help eliminate deliberate or unintentional human errors. The security e-gates will provide the passengers with the opportunity to use a mobile telephone message as a boarding pass. It is an environment friendly solution as the printed boarding passes will not be required any more.

The project will also deal with a baggage reconciliation system (BRS) ensuring that the baggage travels on the same flight as its owner and all the security checks have been made. The possibility of baggage being lost or not arriving at its destination will be reduced to the minimum.

Notably, the BRS will greatly save the time needed for handling of baggage. The airport will receive the information about the baggage and will be able to forward it to the airport of destination.

Another project activity is introduction of the wireless data transmission network on the airport apron in order to ensure functioning of the BRS and exchange of information.

Total costs of the project amount to LVL 381 309.00 with ERDF contributing LVL 129 641.64 and the Airport providing the rest of the funds. The project was launched in August 2011 and will be accomplished by 19 June 2012.

Free High-Speed Wi-Fi Network

In 2011 Riga International Airport jointly with SIA „Connect IT“ provided free access to Wi-Fi hotspots in the entire airport terminal.

In order to use this service, the client has to connect to RIX FreeWiFi and after a short advertisement the necessary website will be opened. The unlimited internet resources are within an easy reach now. Riga international Airport is one of rare airports in the world offering Wi-Fi service free of charge throughout the terminal; both on the landside and airside. The free Wi-Fi service is just one more way to tell our clients that they are welcome at the airport.

Sale of Travel Bags at the Airport

Since January 2011 at the baggage storage area of Riga International Airport, in Arrivals Sector E on the ground floor a shop of travel bags and security locks has been opened for the passengers.

Packing Materials for Transportation of Liquids

Since 1 April 2011 at the baggage storage area of Riga International Airport a new service has been available for the passengers - the materials for packing liquid substances intended for transportation in the hold baggage.

At the baggage storage area in the Arrivals Sector E the passengers can buy a box for transportation of liquids for 5 lts, including VAT, and check it in additionally.
New Privilege Added to the RIX Club Programme

Since 1 December 2011 the loyalty programme of Riga International Airport has been offering a new privilege to its participants – the opportunity to use the business lounge services free of charge five times during the validity term of their RIX Club card.

The new privilege was made available after the airport’s agreement with Latvia’s national carrier airBaltic allowing Riga International Airport to sign independent agreements with airlines and organisations wishing to use the business lounge.

airBaltic that in December 2011 undertook to host the airport’s RIX Club card holders will continue to serve the passengers at the business lounge.

Riga International Airport expects the new privilege to double the number of RIX Club cardholders over a year. The price of the privilege programme remains unchanged – LVL 129 per year.

VIP Service – Comfort and Personal Attitude

According to the best airport practices the VIP Service of Riga International Airport provides top class services to the airport passengers and visitors. The VIP Centre welcomes the senior officials of Latvia and other countries as well as commercial clients – business people, musicians, athletes etc.

The VIP Centre of Riga International Airport offers its clients:
- Classic service,
- Express service,
- Exclusive client cards,
- Venues for business negotiations,
- Extra services contributing to flawless meeting and seeing off of VIP clients.

In 2011 the VIP Centre welcomed a record monthly number of visitors. In July the services of the VIP Centre were used by 1558 clients.

In the year 2011 the VIP Centre welcomed and saw off the presidents of Armenia and Azerbaijan and Prince of Monaco who came on state visits to Latvia.
Recognition

The Bronze Level of the “Sustainability Index”

On 12 May 2011 awards were given to participants of the “Sustainability Index” campaign based on the assessment of their performance within five fields of sustainable activities. For the first time, after participating in the initiative, Riga International Airport attained the bronze level.

Within the Sustainability Index, companies can qualify in the bronze and silver categories and, since 2011, also in the gold category.

The Sustainability Index for Latvian companies offers the opportunity of using a unique tool for strategic management that allows their activities to be assessed and suggestions to be received from specialists for their future development. Additionally, the general public, the government, and non-governmental organizations can receive reliable information on the activities of businesses in the country, assessing their efforts and their contribution to Latvia’s long-term development.

A Family-friendly Company

On 8 September 2011 the Ministry of Welfare in a solemn ceremony granted the certificates of the family-friendly company status to twelve companies including Riga International Airport.

The twelve companies awarded the certificates were identified and selected in relation with the Sustainability Index by drafting the questionnaires and incorporating appropriate criteria regarding implementation of family-friendly policies in the company.

The Ministry of Welfare assigned the status of a family-friendly company to the enterprises pursuing family-friendly policies both in their business activities and in a wider community context, e.g., by providing services and appropriate facilities.

Main qualification criteria for the status are:

• Compliance of the premises and accommodation with children’s needs, including the children with special needs and families with toddlers;
• Health care for the staff in the workplace;
• Focus on client-oriented services;
• Rendering support to the activities devoted to children and families;
• Participation in charity initiatives;
• The company’s focus on effective coordination of work and family life, e.g., encouraging work from home, flexible or reduced working hours etc.

Number Ten in the Corporate Reputation Survey

In 2011, SJSC Riga International Airport reached the tenth place amongst 150 of Latvia’s largest companies in the reputation list arranged by NordsPorter-Novelli and the newspaper Dienas Bizness.

Every year, 150 Latvian businesses are included in the survey for the country’s top companies in terms of their reputation. They are selected by taking into account their turnover and media publicity from the previous year.

The information for the creation of the Latvian enterprise reputation list was compiled by conducting two surveys amongst economically active members of the public and enterprise managers in Latvia.

Businesses are evaluated and the reputation list is created by independent experts. The respondents assess areas such as whether the company offers good products and services and whether it is a good employer, whether it maintains good corporate communications, and whether it cares about the well-being of society, is looking towards the future and is responsible for the environment.

The Most Commended Company of 2011

At the beginning of April 2011, the campaign “Praise good service!” was completed, during which companies and the general public were asked to pay closer attention to the customer service culture. After the campaign, the most praised enterprises and state and municipality institutions in Latvia were announced.

This year, Riga International Airport was ranked amongst the most commended companies, receiving a prize in the “Infrastructure” category.

The leaders in this contest are those companies that receive the most positive feedback from their clients and the highest evaluation in the survey conducted by TNS Latvia on customer service quality.

Riga International Airport is very grateful to its clients and partners for this evaluation!
Responsibility for the Nation and Environment

The Airport Chooses a Local Partner for Assisting PRM Passengers

In order to provide services to passengers with reduced mobility (PRM), Riga International Airport has signed a cooperation agreement with the organisation SUSTENTO. The airport has decided not to commission foreign consultants for this purpose and thus to save no less than 24 thousand euros.

The cooperation agreement provides for receiving of consultations, drafting of the training programme sections and supply of various visual materials.

Special assistance of the airport personnel is available upon arrival at the airport to people with reduced mobility (in wheelchairs), with hearing and eyesight impairments, with mental conditions or with outwardly undetectable disability, and to seniors having difficulty to walk long distances and use stairs.

It should be added that the number of PRM passengers welcomed by Riga International Airport grows with every year.

Open Door Day at the Air Gateway of Latvia

Learning about the specific work of the airport, touring the terminal and areas normally restricted to visitors, a bus ride on the apron and the opportunity to watch the aircraft at a close range – such was the Open Door Day at Riga International Airport. Overall, in the Open Door Day arranged by the Public Administration visitors were welcomed at 80 organisations throughout Latvia.

Eleven groups of schoolchildren from different places of Latvia had booked a visit to the airport. “Having learned about the Open Day and a free visit to the airport we decided to use this opportunity. It would be nice if there were more places where pupils could go and find out useful things,” said Aija Zvaigznīte, teacher of Form 9, Andrejs Upītis’ Secondary School of Skrīveri.

The visitors were taken on a guided tour of the airport territory starting from the terminal where they were shown the checking-in procedure, the security control and taken on a bus around the runway that is 3 km and 200 m long. The youngsters were fascinated by the airplanes standing on the apron and the exhibits in the Aviation Museum. The tour ended at the baggage reclaim area where the pupils assumed the role of arriving passengers and learned what to do if your bag does not arrive on the baggage belt. Finally the pupils were invited to watch the presentation about the airport and to learn more about he airport processes and the work done by the airport staff.

Spring Cleaning of the Airport Territory

On 30 April 2011 the airport staff with families and friends took part in the annual Big Spring Cleaning Campaign by coming together and tiding up the environment. The slogan of the campaign „Live beautifully! Give joy to yourself and others!”

In the big spring cleaning 175 people participated and collected approximately 400 bags of waste. After the good work they could enjoy rest in a tent where the restaurant Gutenbergs treated them to soup and tea, the musicians of the band Tutti Frutti played and the Street Athletes showed their skills.

In the Big Spring Cleaning Campaign a competition was held for the title of the Campaign’s Most Enthusiastic Department 2011, won by the Finance Department. Every employee of the department received a ticket to Riga Zoological Garden.

Open Door Day at the Air Gateway of Latvia

Learning about the specific work of the airport, touring the terminal and areas normally restricted to visitors, a bus ride on the apron and the opportunity to watch the aircraft at a close range – such was the Open Door Day at Riga International Airport. Overall, in the Open Door Day arranged by the Public Administration visitors were welcomed at 80 organisations throughout Latvia.

Eleven groups of schoolchildren from different places of Latvia had booked a visit to the airport. “Having learned about the Open Day and a free visit to the airport we decided to use this opportunity. It would be nice if there were more places where pupils could go and find out useful things,” said Aija Zvaigznīte, teacher of Form 9, Andrejs Upītis’ Secondary School of Skrīveri.

The youngsters were fascinated by the airplanes standing on the apron and the exhibits in the Aviation Museum. The tour ended at the baggage reclaim area where the pupils assumed the role of arriving passengers and learned what to do if your bag does not arrive on the baggage belt. Finally the pupils were invited to watch the presentation about the airport and to learn more about he airport processes and the work done by the airport staff.
Supporting Social Projects

In 2011 Riga International Airport rendered its support and participation in several social projects of public importance.

In honour of Earth Day and within the framework of the project „the Greenhouse Effect“ in April 2011 a real greenhouse was installed at Riga Airport with information materials on the climate change, global warming, sustainable consumption and development as well as with examples of good practice. The event was arranged by Europe Direct Information Centre in Riga jointly with the Latvian Chamber of Commerce and Riga International Airport. The partners of the project were World Wildlife Fund, the Sustainable Development Agency, SIA Gribu visu and SIA Padod tālāk. The goal of the project was to create a platform for discussions on global warming and sustainable consumption.

The European Consumer Centre (ECC Latvia) jointly with the Consumer Rights Protection Centre (CRPC) and the society lecas sievietu Klubs Lēps in July 2011 arranged a one-day campaign supported by the European Commission Aviation Passengers’ Rights Day at Riga International Airport. As the air traffic and the number of users of aviation services grow, so does the importance of being informed of the air passenger’s rights, the possibilities of their implementation and the airlines’ duties in problem situations.

In January 2011 the society Patvērums Drošā māja (Shelter Safe Home) held an awareness campaign Fictitious Marriage – a Trap! attracting the airport clients’ attention to one of the forms of human trafficking – fictitious marriage. The goal of the campaign was to inform the public of the underlying risks of concluding fictitious marriages with third-country citizens with or without monetary recompense.

In July 2011 a Blood Donation Day was arranged at the airport. The National Blood Service bus stopped at the short-term car park P1 and every employee of the airport or the airport tenant companies was given the opportunity to give blood.

Helping Those Who Need It Most

Riga International Airport as a socially responsible company supports charity organisations on a daily basis by allocating places for their donation collecting stands in the terminal. Thus every airport visitor and employee can extend a helping hand to those organisations all year round. On the aside of the airport terminal there are ten donation stands of such charity organisations as Juglas Dzīvnieku aizsardzības grupa (Jugla Animal Protection Group), Latvijas Sanktماتs Krusts (Latvian Red Cross), Latvijas Nacionālās bibliotēkas Atbalsta biedrība (Society for Support of the National Library of Latvia), SGS bērnu cietaņu asociācija (Association of the SOS Children’s Villages), Latvijas Bērnu fonds (Latvian Children’s Fund) and the charity mission Dzīvības ēdens (Food for Life).

One of the organisations that has held its stand for the entire year 2011 is Juglas Dzīvnieku aizsardzības grupa that exists only thanks to donations and for more than ten years has maintained a dog shelter in Riga for stray, abandoned and homeless animals. The shelter rescues more than 250 dogs every year and finds new homes for them. The head of the shelter Linda Zirdziņa told that, „thanks to the donation box installed at the airport in the first ten months of 2011 more than LVL 2000 were collected for maintenance of the animal shelter, which is a significant sum indeed.”

The staff of Riga International Airport take an active part in the charity campaigns arranged at the airport. For three years already Riga International Airport has been cooperating with the Latvian Society for Support of Low-income People „Dace“. The airport responded to the society’s invitation to participate in the activity „From Heart to Heart“ that took place twice in 2011. The airport employees could donate the items of daily use to the low-income families of Latvia. The airport staff rendered material support to the families and the children with special needs growing in these families.

The chairman of the society Dace Dimitrijeva expressed immense gratitude to Riga Airport staff for the donations to the people who are going through a difficult time and are on the borderline. To date approximately 740 households are registered with the society and are in need of material support.

The European Consumer Centre (ECC Latvia) jointly with the Consumer Rights Protection Centre (CRPC) and the society lecas sievietu Klubs Lēps in July 2011 arranged a one-day campaign supported by the European Commission Aviation Passengers’ Rights Day at Riga International Airport. As the air traffic and the number of users of aviation services grow, so does the importance of being informed of the air passenger’s rights, the possibilities of their implementation and the airlines’ duties in problem situations.

Airport Events

In 2011 SJSC Riga International Airport celebrated the twentieth anniversary of its corporate status. In the framework of the anniversary the airport administration and the Ministry of Transport congratulated the airport veteran employees.

The staff of Riga Airport are in excellent physical condition and we prove it every year by participating in Nordes Riga Marathon and other sports events.

To make the time spent by the passengers at the airport more pleasant and to support young artists, Riga International Airport several times a year turns into an exhibition hall. In 2011 at the airport terminal the passengers could view the exhibition of Sandra Sileviča’s canvas paintings “Summer’s Glory”, the photographs of the Latvian Olympic Committee “Meet the Olympic Athletes” and the works of the pupils of Ķekava art school presented by Ķekava Municipality “Latvia Through the Prism of Ķekava”.

The German carrier Lufthansa celebrated its twentieth anniversary of operations at Riga Airport. The arriving and departing passengers of the jubilee flight got a special welcome and the aircraft was received at the airport with cheers and water christening.

By taking part in the Shadow Day every year in February Riga International Airport gives schoolchildren the opportunity to spend a day at the airport and learn about various jobs thus helping them choose their future profession.

Since the year 2004 when Ireland’s low-cost carrier Ryanair started its operations at Riga Airport seven years have elapsed and five million passengers of this airline served …
The airport is the place that often gets into the focus of attention when we welcome or see off Latvian or foreign officials and celebrities.
